Mr. Paul Boots

Associate Director-Precious Gems

Dubai Multi Commodities Centre

Almas Tower, Level 62

Jumeirah Lakes Tower

Dear Sir

Allow me to take this opportunity in wishing you seasonal greetings and a successful 2010. I would also like to thank you for hosting me during my short visit to Dubai and the introduction to the Dubai Multi Commodities Centre. As Chair of the Kimberley Process Certification Scheme I have been very impressed with the systems of diamond accounting and auditing and therefore,

- The DIAMCARE MINERAL MANAGEMENT AND CONTROL SYSTEM as suggested by the Dubai Multi Commodities Centre in December 2009 as a solution for the internal controls, would fast track the process towards compliance of the diamond trade in Zimbabwe
- It is my understanding that the MINERAL MANAGEMENT AND CONTROL SYSTEM is a UN recommended internal control system which can assist countries to meet the minimum standards of the Kimberley Process Compliance requirements.

COC Platform

- **Digital chronological documentation trail**

KYC platform

- **Document verification**
- **In-depth second and third level analyses**
- **Credential application**

Thank you for your attention
